

Diversity Committee Mission

Our goal is to improve the knowledge and respect of all diversity aspects among our college and community. NCTC is first, a learning environment which gives students the opportunity to grow and become professionals who understand the value of diversity in our college, community, workplace and global environment. Our mission will be met through learning, sharing and retention of students while providing a safe environment for all. (Richard Wills)

NCTC is committed to creating an educational environment that values inclusion, equity, and pluralism in its policies, practices, and programs.
Motto: The best in each of us enriches all of us.
(Pam Schorsch)

The goal of the Diversity Committee is to improve and continually increase awareness of, knowledge about and respect for all aspects of diversity among the people of our college community and within the communities we serve. NCTC will provide opportunities for students, faculty, staff and members of the community to experience diversity in an environment that is welcoming and safe psychologically, physically and professionally. NCTC will help prepare those we serve with skills for using diversity to help achieve personal and professional success in the global community. (Robin Silverman)

The college community pledges to promote an atmosphere which encourages the development of potential and promotes the value of diversity. (Borrowed in part from Dakota State University)
