

Information Technology Team Meeting

Date: 5/14/2012

Time: 2:00 PM

Location: EGF 115 TRF 545, AC13

Chair: Stacey Hron

Recorder: Holly Deschene

Next meeting date: TBD – Need to set up a summer schedule.

Members Present: David Paul, Karleen Delorme, Stacey Hron, Don Smith, David Olsen, Paulo Perez, Holly Deschene, Jason Misialek, Scott Foss, Jennifer Amiot

Members not present:

Agenda

Updates from IT conference

Updates from IT conference

1. **Holly:** Topic – Asset management barcode system: ITS has purchased a new Asset management barcode system called WASP. We will be implementing it over the summer.
2. **Paulo:** Topic- Ipads/Smartphones– We need a policy for ipad App purchases. How do people print from iPads on campus? Paulo discussed the security issues in regards to these mobile devices. At this point Holly is mentioning to people when they request to purchase iPads that written approval from the supervisor must be received and that currently iPads are unable to print on our network. Scott provided insight on the security policies from MNSCU on the issue of Mobile devices.
Ticketing system on SharePoint – Paulo has already created custom code for a system like this for marketing and thought maybe we could use that instead of GroupLink. Stacey said “we have a system that works, we will stick with that.”
3. **Scott:** Topic: Not giving full Admin rights to computers: “Beyond trust power broker” software...elevates an application Admin rights not the user. The benefit of this cuts down on Malware and installing of un-approved software.
Virtualization of Enterprise applications such as Exchange. Not sure if it was MNSCU or OET that is doing this, but it is working and being done in the system.
IPV6: State says we need to disable IPV6 for security purposes until the State is ready for a full roll out.
4. **Don:** Don feels that we will be hit with an audit sooner than later.
5. **Radio Station:** Seems like the only thing left is the phone to work for “on-Air”.
6. **Separating employees:** When backing up employee data for supervisors, we must use CDRs or DVDR not RWs.

Adjourn: 2:55
